Monitoring

One menu bar to easily select the functions or the specific input.

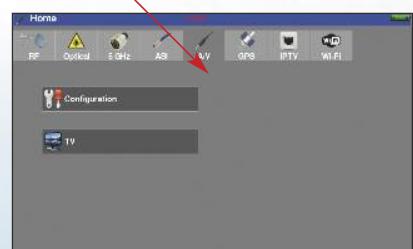

Specific menus to save time

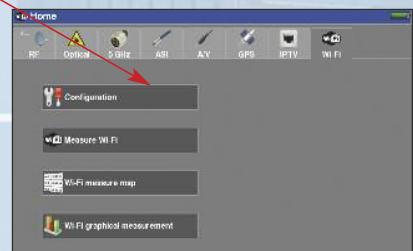

All necessary function to qualify your IPTV networks

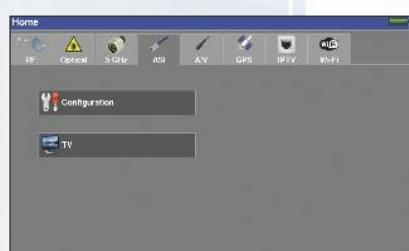

To qualify an optic fiber network for terrestrial, cable or satellite TV.

Some TV networks still use analogue programs: your TV analyser will provide the TV programs decoding and display. The analogue input / output are useful to check signals from HD analogue cameras.

WiFi networks can be analysed with specific functions and measurements.

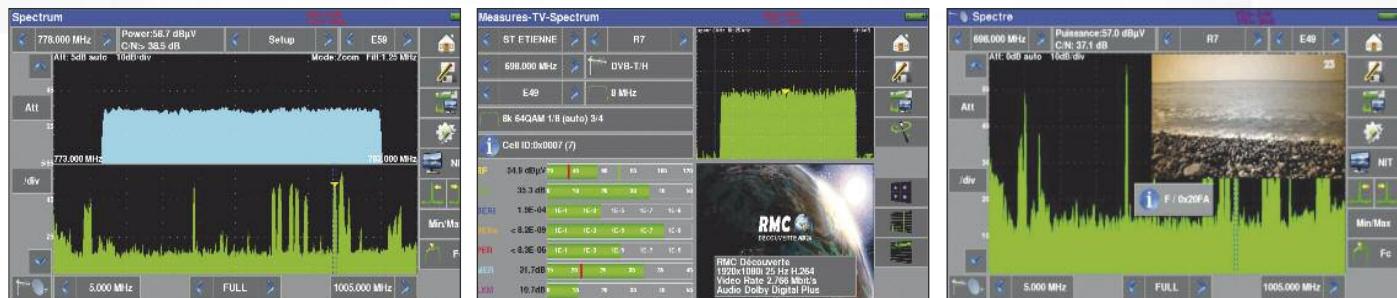

For head broadcasting stations, the ASI input / output will provide the transport stream analysis.

Using the internal GPS makes the mapping of a geographical area very easy and convenient.

Analyse and measure
with the best accuracy

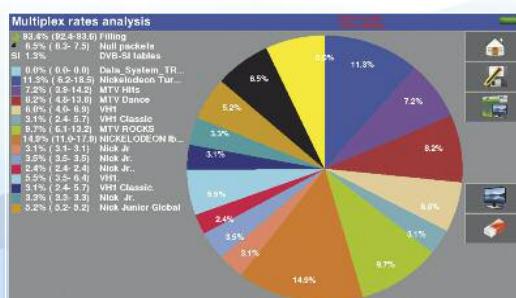

TV ANALYSER

A zoom function is provided to check in detail TV signals and the quality of the TV installation.

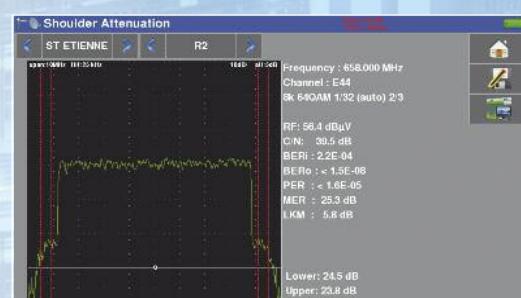

A single screen with all necessary information.

MPEG-2 and MPEG-4 data flow analysis according to ETR 101-290

Checking the content of the multiplex data flow is now possible with log file capability.

Shoulder measurement for DVB-T and DVB-T2 reception

Today's and tomorrow's measurements

**HEVC
H.265**

Decoding and display of H.265 (2k) HD TV programs.

IPTV

**T2MI
via IP**

The ideal tool to test your IPTV network:
hotels, hospitals, industry,...

T2MI analysis including display TV programs.

**Optic
Fiber**

All measurements for optic fiber are provided.

**DAB
DAB+**

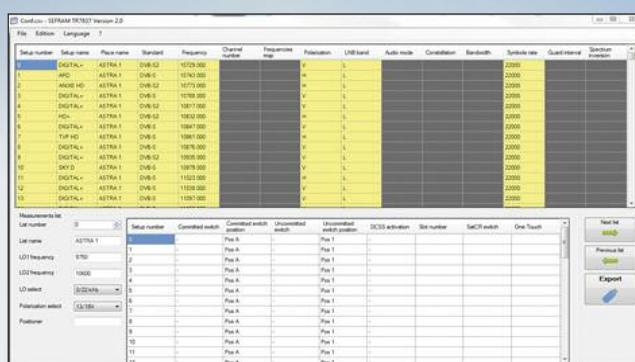

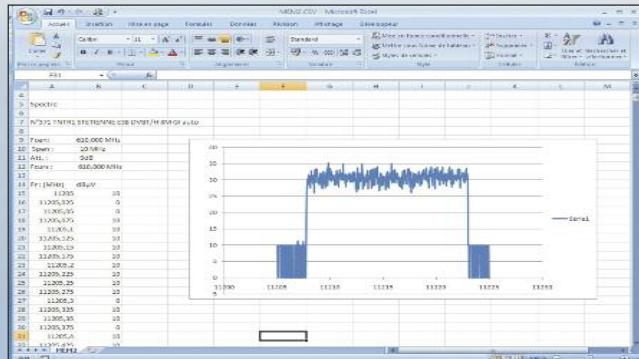

FM-RDS

DAB, DAB+, FM with RDS analysis is provided. Stereo sound is available with headphone output.

Sefram 7940

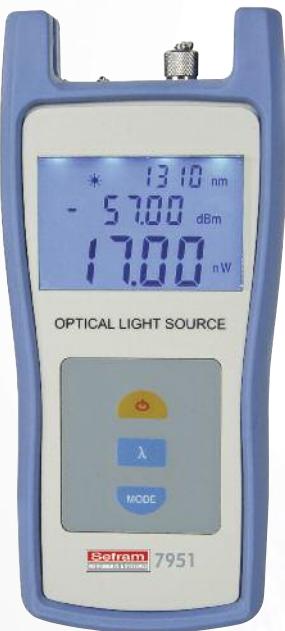

Optical power meter

- Optical power measurement in dBm or mW
- 5 wavelengths available: 850nm, 980nm, 1300nm and 1550
- Insertion loss measurement
- Panoramic LCD with backlight
- Auto power-off

Specifications

Display	graphical LCD with backlight
Wavelength	850, 980, 1300, 1310, 1550nm
Dynamic	-50 à +26 dBm
Accuracy	linear: 0.1% - non linear: 0.01dBm

Supplied with: batteries, manual, protective holster, carrying pouch, connectors.

Sefram 7951

Optical light source

- Provides 2 wavelenghts for single mode fiber
- Output modulated
- Compact housing with protective holster
- Easy-to-use

Specifications

Display	graphical LCD with backlight
Wavelength	1310, 1550
Modulation	270Hz, 1KHz, 2KHz
Output pow:	-7 dBm

Supplied with: batteries, manual, protective holster, carrying pouch, connectors.

Sefram 7951M: Provides 2 wavelenghts (850 and 1300 nm) for multi-mode fiber

Sefram 7950

Visual fault finder

- Low cost solution for testing the continuity of fibers
- Laser source with 650nm (visible)
- CW or pulse mode
- Robust metal case

Specifications

Output wavelength	650 +/- 10
Output power	3mW
Pulse mode	2-3 Hz

Supplied with: batteries, manual, carrying pouch
